## **Amendment Of The Abstract New Abstract**

**A cooking apparatus having an enclosure that consists of a bottom wall, sidewalls, back wall and a partial front wall.**

**You have a cooking rack that rest on top of the enclosure. Below the cooking rack you have a waterproof container that consist of bottom wall, sidewalls, back wall and a front wall that holds the charcoal rack for burning charcoal or wood.**

**The charcoal rack is centered in the center of the said container. Rails located inside the container support the charcoal rack.**

**The enclosure also has rails positioned inside of the said enclosure for holding said container.**

**The said enclosure partial front wall is used for sliding container in or out of the said enclosure.**
